DETAILED ACTION

Drawings

1. The replacement drawings were received on 19 June 2006. These drawings are accepted by the Examiner.
2. The replacement drawings show reference character 28 (Figure 2) referred to in the previous office action is now reference character 22, which is mentioned in the description. No further action is required.

Specification

3. The corrections to the specification filed on 19 June 2006 are accepted by the Examiner.

Allowable Subject Matter

4. Claims 1-3 are allowed.
5. The following is an examiner's statement of reasons for allowance: The applicant claims a hand piece used for suction type dermabrasion device. The limitation in the claims that make the claims allowable over the prior art is the structure of the tip. The tip consists of a cylindrical upper stage and a cylindrical lower stage. The diameter of the upper stage is smaller than the diameter of the lower stage. An abrasive surface is formed on the upper surface of the upper stage, and a plurality of suction holes are formed through the lower stage around the periphery of the upper stage. The lower stage has a diameter fitting into a hollow of a tubular housing and is elastically supported by a spring. The limitations described above are included in all the claims and are not found in the prior art references.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
